

Exclusive offer, members American Holly Society

Choice Rare Named Hollies

any 12

Insured postage paid, guaranteed safe delivery. You must be pleased with your purchase or full refund will be made if plants are returned prepaid within 5 days.

for \$9.95

These plants are fine one-year-olds, ranging in height from 4 inches for dwarfs to 8 to 10 inches for tall growers. We have large quantities available in most kinds, for orchard planting.

Plants are growing and shipped in cypress plant bands and may be safely transplanted now, or whenever you wish. Shipments will be made promptly unless you instruct otherwise. They need only half-shade and water, since they are shipped and planted right from bands. A loss of less than 1% is normal.

All shipments are made in special patented containers holding exactly 12 plants. Select as many as you wish, but your order must run in 12's (24, 36, 48, etc.)

CHOICE ILEX OPACA CLONS

All are available in quantity except three marked "Supply limited".

"p. 22-17" etc. shows where description occurs in HOLLY HANDBOOK.
("Not listed" indicates not described there.)

CHRISTMAS SPRAY: Female. Rapid growing with large leaves, good sized red berries on long stems. Supply limited. (p. 22-17)

CLARK: Small compact female with upright branches and graceful shiny leaves. Bright red berries. (p. 22-18)

HOWARD: Vigorous female densely branched and abundant fruiter. Leaves often spineless. Not winter hardy north of Mason-Dixon line, but one of the finest for southern planting. (p. 25-48)

KOLES ANGELICA: A new female form with leaves and form similar to Arden but deeper green. Good sized berries in profusion. (Not listed)

MAURICE RIVER: Vigorous female with good glossy green foliage and upright habit. Heavy bearer. (p. 27-68)

MENANTICA: Rapid growing female, setting numerous fruits when only two years old. Foliage deep green with plenty of spines. (p. 27-70)

MERRY CHRISTMAS: Dependable female with good green leaves. One of the most popular. (p. 27-71)

> MERRY CHRISTMAS CONVEX: Crinkly leaves on compact plant with dark red berries. Plenty of spines. (Not listed)

MISS HELEN: Popular female of conical habit with large egg-shaped berries. (p. 29-73)

NEEDLEPOINT: Foliage small and attractive with very sharp spines as name indicates. Excellent bearing habits. (Not listed)

* NORFOLK: A good clon for orchard because of large attractive foliage and heavy berry-bearing habits. Spreading form, thus easy to cut. (p. 29-81)

PARKTON: Upright and heavy bearing female. Excellent dark green foliage. (Not listed)

RICHARDS: Vigorous growing female with berries in large clusters. Broad flat leaves. Very desirable, but not winter hardy north of Philadelphia. Limited quantity. (p. 30-94)

SALEM COMPACT: Slow growing dwarf-type female of narrow pyramidal form. Short, thick, leathery leaves. Excellent for restricted areas. (p. 30-98)

SUBINTEGRA: This form is different. The leaves have no spines but are smooth and leathery. It becomes a large shrub rarely over 12' tall. Large deep red fruits. Hardy to Boston. We offer both male and female: State which you wish. (Not listed)
